RTI!

Special Needs flyer

Child1st products are designed to reach students where they are regardless of grade level. In this catalog we have identified products for 3 different skill levels:

Our READING BASICS category is for any first-time learner, or any child who is struggling to read, no matter the age. If your child is not successful with sounding out words, struggles with vowel sounds, or just doesn't seem to "get" reading, our Easy-for-Me™ Teaching Kit will be a good choice.

LEVEL 1 students are comfortable with sounds and can sound out words, but are sounding out everything they read, making reading a real chore! They need something new that will give them an incentive to try again. Designed for students who are discouraged & need to succeed in actually reading words.

LEVEL 2 students can read, but are way below grade level and are working so hard to read, making them avoid reading. Rather than giving them easier books to read, teach them how to read successfully by teaching them the structure of words.

Reading Basics

The Easy-for-Me™ Complete Teaching Kit

This multisensory kit empowers you to teach reading to children with diverse learning styles while ensuring that no child is left out. (For full class or small group)
