

SnapWords™ Making Sentences

- Use stylized SnapWords® cards to make these short sentences in your pocket chart. Duplicated words are provided for you, written in plain font. Best if printed on card stock and laminated.
- This activity need only take 5-10 minutes a day during opening exercises.
- After the children can easily read the phrases, start turning over a card here and there so that the plain word is showing rather than the stylized word. Let the children decide which words they want to turn over.
- To vary your activity, decide with your children how you can change the sentences by substituting some of the words with others.
- Below are the sentences you may use if you want to display all of the words from List C at one time in your pocket chart.

C

Go around again before long.
I know you'll live next to her.
